

Human-assisted Computation: Autograding

```
1 int fib(int n) {  
2     if (n < 1)  
3         return n;  
4     else  
5         return fib(n) + fib(n - 1);  
6 }
```

Fig. 3: C snippet that calculates the Fibonacci number, with a few errors deliberately added in.
