

# Stride scheduler

- Job counters support determining which job to run next
- Over time jobs are scheduled to run based on their priority represented as their share of tickets...
- Tickets are analogous to job priority

Tickets  
C = 250  
A = 100  
B = 50

Pass(A) (stride=100)	Pass(B) (stride=200)	Pass(C) (stride=40)	Who Runs?
0	0	0	A
100	0	0	B
100	200	0	C
100	200	40	C
100	200	80	C
100	200	120	A
200	200	120	C
200	200	160	C
200	200	200	...
