Advantages of Cloud Computing

PaaS and SaaS take care of instant software updates:

Another advantage to cloud computing is that you are no longer faced with choosing between obsolete software and high upgrade costs.

With web-based applications (i.e., SaaS), updates happen automatically
- available the next time you log into the cloud.

When you access a web-based application, you get the latest version
- without needing to pay for or download an upgrade.

SaaS leads to improved document format compatibility.

You do not have to worry about the documents you create on your machine being compatible with other users' applications or OSes

There are potentially no format incompatibilities when everyone is sharing documents and applications in the cloud.
